Clymer Web Design — Portfolio Website

clymerwebdesign.com

1. Project Overview

A personal portfolio and lead-generation website for Clymer Web Design (CWD), a local web design business run by Greyson Clymer. The site serves two purposes: (1) demonstrate design and development skill to potential clients, and (2) convert visitors into inquiries through a quote builder. The site must look impressive enough that a small business owner sees it and immediately thinks "I want something like this."

Stack: HTML/CSS/JS — GitHub + Netlify deployment **Domain:** clymerwebdesign.com **Pages:** Two — a main landing page (/) and a quote builder page (/quote)

2. Brand Identity

Business name: Clymer Web Design **Abbreviation:** CWD **Logo:** Two versions provided

- Full logo: "CWD" monogram stacked above "CLYMER WEB DESIGN" wordmark in all-caps spaced tracking
- Icon: CWD in a rounded rectangle — used for favicon, nav, and small placements
- Color: Deep navy (#0D1B3E or close equivalent)
- A full white version of both logos is needed for use on dark backgrounds

Brand personality: Professional but not corporate. Creative but not chaotic. Direct. Local. Built by a real person, not an agency.

3. Design System

Colors

Role	Value
Brand navy	#0D1B3E
Page background	#FFFFFF
Light surface	#F7F7F5
Body text	#1A1A1A
Muted text	#6B6B6B
Border	rgba(0,0,0,0.08)

Ticker tag colors (hero section only): Each business type in the scrolling tickers gets its own bright color tag. Colors should be genuinely punchy and vibrant — not pastel, not muted.

Suggested pairings:

- Restaurants → coral red
- Coffee shops → warm amber
- Barbershops → electric blue
- Mechanics → slate green
- Churches → soft purple
- Food trucks → bright orange
- Salons → hot pink
- Gyms → lime green
- Photographers → sky blue
- Non-profits → teal
- Contractors → burnt orange
- Local shops → golden yellow

These colors are isolated to the hero and do not appear elsewhere in the site.

Typography

- **Logo font:** KN Yuanmo SC — used in the CWD logo. Do NOT use this as the site's body or headline font. It is a display/logo typeface and will feel heavy and repetitive if used throughout the site. Keep it exclusive to the logo so it stays special.

- **Site headline font:** Pair KN Yuanmo SC with a clean geometric sans-serif for headlines and body. Suggested pairings that complement its bold geometric character: Inter, Satoshi, or Plus Jakarta Sans (all free via Google Fonts or Fontshare)
- Hero headline: 52–60px, bold/black weight
- Ticker text: 52–60px, bold/black weight — this is the visual centerpiece, it must be large
- Section titles: 32–38px, bold
- Body copy: 16–17px, regular weight, 1.7 line height
- Nav links: 13–14px, regular
- Labels/eyebrows: 11px, uppercase, wide letter spacing

Spacing

Generous. The site should breathe. Section padding should be at minimum 80px top and bottom. Don't crowd anything.

Corners

Rounded. Cards use ~12px radius. Buttons use ~8px. Ticker tags use a full pill shape (high border-radius).

Shadows

Subtle only. Cards can have a very soft shadow on hover. Nothing dramatic.

4. Page 1 — Main Landing Page (/)

4.1 Navigation

- Fixed/sticky on scroll
- Left: CWD icon logo (white version — sits on navy background at top, switches to navy version as page scrolls)
- Right: Work | About | Get a Quote
- "Get a Quote" is a small filled button (navy background, white text)
- On scroll past hero: nav background becomes white with a subtle bottom border — the logo and links switch to dark

4.2 Hero Section

Background: Dark navy (#0D1B3E), full viewport height

Layout (top to bottom):

1. Small eyebrow label — "Local web design" or "Affordable · Fast · Local" — small, light opacity white text, uppercase, wide tracking
2. Headline — "Websites for:" — large but not the largest thing on screen, white, bold. This is the setup, not the star.
3. Ticker Row 1 — scrolls LEFT, continuously looping
4. Ticker Row 2 — scrolls RIGHT, continuously looping (opposite direction)
5. CTA button — "Get a free quote →" — white background, navy text, centered below tickers

Ticker design:

- Each business type is a rounded pill/tag with its own bright background color and white text
- Tags are large — font size 52–60px, bold — so they practically fill the row height
- Gap between tags is generous (around 40–60px) with a subtle separator (a dot or dash) between each
- Both rows together should occupy roughly 60–70% of the hero's total height
- The scrolling is smooth, continuous, and automatic — no pause on hover
- Tags are NOT links — purely visual
- Content for Row 1: Restaurants, Coffee shops, Barbershops, Mechanics, Churches, Food trucks, Photographers
- Content for Row 2: Salons, Gyms, Law firms, Non-profits, Contractors, Local shops, Tutors
- Each row's content is duplicated so the loop is seamless

CTA Button:

- White background, navy text
- Rounded corners
- On click: navigates to /quote

4.3 About Section

Background: White

Layout:

- Small uppercase label: "About"
- Headline: "Real websites. Real prices." (or similar — can be refined)
- 2–3 sentence paragraph: Personal, direct. Mentions Greyson by name. Mentions local area. Mentions fast turnaround and affordable pricing.
- Optional: 2–3 small stat pills below the paragraph — e.g. "5 sites built" / "Under 1 week turnaround" / "Starting at \$150"

Width: Centered, max ~600px — this section is intentionally compact

4.4 Portfolio Section

Background: Light surface (#F7F7F5) or white — alternate from about section

Layout:

- Small uppercase label: "Work"
- Section headline: "Recent projects"
- Grid of project cards — 3 columns on desktop, 1 column on mobile
- Below the grid: a subtle "More coming soon" note or left empty if enough projects exist

Project card design:

- White background
- Soft border
- Top: screenshot thumbnail of the actual website (full-width within the card, fixed height ~180px, object-fit cover)
- Bottom: project name (bold, 15px) + business type label (muted, 13px)
- Hover effect: card tilts subtly in 3D toward the cursor (CSS perspective tilt — not a flat scale) and lifts slightly with a soft shadow
- Clicking a card ideally links to the live site

Current projects to include:

1. NHS chapter website — School organization
2. Mechanic service website — Local business (brother's business)
3. IB CAS time capsule — Non-profit / school project
4. Beta Club website — School organization (mark as "in progress" if not yet live)

4.5 Services / Pricing Section (Optional but Recommended)

Background: White or navy (navy creates a strong visual break)

If included, keep it short — three package tiers in a simple card row:

- Starter: up to 3 pages, \$150–\$250
- Standard: up to 6 pages, \$300–\$450
- Business Pro: up to 10 pages, \$500–\$700

Each card has the tier name, price range, a one-line description, and a "Get a quote" button.

If the full pricing feels too committal this early, replace with a single CTA section:

- Headline: "Ready to get online?"
- Subtext: one sentence
- Button: "Build my quote →" → navigates to /quote

4.6 Footer

Background: Dark navy (matches hero — bookends the page)

Layout: Single row or two-row max

- Left: CWD icon logo (white)
- Center or right: hello@clymerwebdesign.com · Instagram link
- Bottom line: "© 2026 Clymer Web Design"

Minimal. No extra links, no sitemap, nothing bloated.

5. Page 2 — Quote Builder (/quote)

5.1 Overview

A multi-step, conversational quote form. The goal is to feel like a brief conversation rather than a boring contact form. At the end the user sees an estimated price range and a prompt to send a message.

Background: White, clean, distraction-free

5.2 Layout

- Same nav as main page
- Large centered step indicator at the top (e.g. Step 1 of 4)
- One question displayed at a time
- The next question slides in after the current one is answered
- Progress bar along the top (thin, navy)

5.3 Steps

Step 1 — Business type "What kind of business do you have?" Options (clickable cards or buttons): Restaurant / Food & drink, Health & beauty, Trades & services, Retail & shops, Organization / non-profit, Something else

Step 2 — What they need "What are you looking for?" Options (multi-select): A brand new website, Replace an old website, Just need it on a custom domain, Not sure — need advice

Step 3 — Pages "How many pages do you think you need?" Options: 1–3 pages, 4–6 pages, 7–10 pages, Not sure

Step 4 — Extras (multi-select) "Anything else you'd like included?" Options: Contact form, Photo gallery, Google Maps embed, Social media links, Custom domain setup help, I'm not sure yet

Result screen:

- Shows estimated price range based on selections
- Headline: "Here's your estimate"
- Price range displayed large and bold
- Short note: "This is just an estimate — final pricing is confirmed before any work begins."
- Simple contact fields below: Name, phone number or email, brief message (optional)
- Submit button: "Send my quote request"
- On submit: Shows a thank you message. Sends an email notification to clymerwebdesign@gmail.com (use Formspree or Netlify Forms — free)

5.4 Pricing Logic (for the result calculation)

Pages	Base price
1–3 pages	\$150–\$250
4–6 pages	\$300–\$450
7–10 pages	\$500–\$700

Each extra selected adds \$25–\$50 to the range display. Keep it as a range, not an exact number.

6. Responsive Behavior

Desktop (1024px+): Full layout as described above. Portfolio is 3-column grid.

Tablet (768px–1023px): Portfolio drops to 2-column. Ticker font size scales down slightly (~44px). About section stays centered.

Mobile (under 768px):

- Nav collapses — keep logo left, "Get a quote" button right only (hide Work/About links)
 - Hero ticker font scales to ~32–36px — still large and impactful
 - Portfolio is 1 column
 - Quote builder steps stay full width, well padded
 - Everything single column
-

7. Performance & Technical Notes

- No heavy libraries or frameworks — plain HTML, CSS, JS
 - Images: compress all screenshots before uploading (use squoosh.app — free)
 - Tickers: pure CSS animation only, no JS needed
 - Tilt effect on portfolio cards: small vanilla JS snippet (Tilt.js or a manual mousemove handler — lightweight)
 - Forms: use Netlify Forms (free, built into the deployment) or Formspree (free tier)
 - Fonts: load from Google Fonts — use `display=swap` to avoid layout shift
 - Favicon: use the CWD rounded rectangle icon, exported as a 32x32 and 180x180 PNG
-

8. Content Checklist (To Be Filled In Before Build)

- ☐ Final 2–3 sentence about blurb written
 - ☐ Screenshots of all live portfolio sites captured (full page, desktop view)
 - ☐ CWD logo exported in all versions: full color, all white, transparent background
 - ☐ Business email confirmed (clymerwebdesign@gmail.com or hello@clymerwebdesign.com via Zoho)
 - ☐ Instagram handle decided (if using one)
 - ☐ Formspree or Netlify Forms account set up for quote submissions
 - ☐ Domain purchased on Namecheap (clymerwebdesign.com)
-
